

Travelers Tonic

Content

Jackass Bitter
Guava Leaf

Properties

Anti- microbial
Anti- diarrheal
Anti- salmonella, anti- malarial, anti- amoebic, anti- fungal, anti- parasitic

Indications

Traveler's diarrhea
Amoebas, intestinal parasites, salmonella poisoning, food poisoning
Gastric distress
Constipation

Dosage

Prevention while traveling: 1 dropperful once daily, increasing to 2- 3 dropperfuls if water or food is suspect.

Acute symptoms 1 dropperful in one half- glass tepid water hourly.

Vomiting: 3 dropperfuls in glass of tepid water; sip slowly every five minutes

Chronic parasite or amoeba 1 dropperful in half glass tepid water three times daily for ten days. Stop for three days and get a stool test. If still present, repeat this pattern of ten days on & three days off until stool is free of parasites or eggs.

Constipation 1 dropperful in a half glass of water four times daily, or place 4 dropperfuls in a quart of water and sip all day until finished. Does not cause diarrhea but a comfortable, copious movement.

Children May take 1 dropperful in a mouthful of juice or a teaspoon of honey. *Not for children under three years of age.*

Contraindications

Pregnancy, infancy up to 3 years of age.
Prolonged use for longer than 4 weeks (with intervals of rest as above) is not advised.

If at any time you've questions or concerns, please contact me via call, text, or email.
